A multidistrict litigation (In re: FCA US LLC Monostable Electronic Gearshift Litigation, Case No. 2:16-md02744) is pending before Judge David M. Lawson in the U.S. District Court for the Eastern District of Michigan. In this case, Plaintiffs assert that Defendant FCA US LLC (“FCA US”) designed, manufactured, and sold 2012–2014 Dodge Chargers, 2012–2014 Chrysler 300s, and/or 2014–2015 Jeep Grand Cherokees (“Class Vehicles”) with a Monostable shifter that is dangerously defective in design. FCA US denies the allegations, denies the existence of any safety hazard, and denies the Class Vehicles are defective. The Court has not yet decided who is right. The Court has decided this case should proceed as a class action lawsuit to decide three questions: a) whether the Monostable gear shift has a design defect that renders the Class Vehicles unsuitable for the ordinary use of providing safe transportation; and b) whether FCA US knew about the defect and concealed its knowledge from buyers of the Class Vehicles; and c) whether the concealed information about the defect would be material to a reasonable buyer. Trial is currently set to begin on August 11, 2020, but the date is subject to change. There is no money available now. There is no guarantee there ever will be. Your legal rights may be affected and you must make a choice now. However, there is no money available now and no guarantee there ever will be. If you stay in the case, you give up any rights you may have to sue FCA US separately concerning the same legal claims as those that are in these lawsuits. WANT MORE INFORMATION?
